PROFESSIONAL SUMMARY:

Cloud-focused Systems Engineer with 10+ years supporting mission-critical DoD environments and 24/7 operational networks. Experienced in AWS, Linux, Windows Server, Active Directory, virtualization, automation, and secure hybrid architectures. Proven ability to harden systems, automate deployments, troubleshoot complex outages, and support scalable, security-first infrastructure across enterprise and tactical environments.

KEY SKILLS:

AWS • Azure (Fundamentals) • Docker •Jenkins • Github • Linux • Window Server • Active Directory • Network Troubleshooting • Python • Bash • PowerShell • Security+ • STIG • Secure Enclaves & Compliance

HIGHLIGHTS OF EXPERIENCE:

Network/Computer Systems Administrator **July 2023 - Present**

AERMOR LLC

- Administer and harden 100+ Windows and Linux systems across hybrid environments supporting 24/7 mission-critical operations.
- Manage Hyper-V virtualization infrastructure including VM deployment, clustering, resource allocation, and performance monitoring.
- Maintain Active Directory users, groups, OUs, certificates, and Group Policy Objects to support secure authentication workflows.
- Support network-attached storage, backup schedules, and recovery operations across multi-system environments.
- Assist in vulnerability assessments by validating ACAS/SCAP findings and implementing remediation actions.
- Troubleshoot system and network outages, restore services, and document root-cause analysis for leadership and engineering teams.
- Develop deployment task sequences using MECM/MDT methodologies and modern automation concepts.
- Deliver technical reports, architecture recommendations, and system improvement roadmaps to senior leadership.

United State Air Force Member **Nov 2014 - Present**

- Operate and maintain mission-critical communications systems including radio networks, dispatch consoles, MDTs, and secure messaging platforms.
- Execute advanced troubleshooting on DoD systems to resolve outages and ensure operational continuity during high-tempo operations.
- Maintain digital security logs, incident reporting, and DoD-compliant record retention.
- Support multi-domain architectures including WAN, LAN, secure enclaves, CCTV, IDS, access control, and high-value asset protection systems.
- Collaborate with cybersecurity, intelligence, and IT teams during inspections, audits, and elevated threat responses.
- Mentor and train personnel while enforcing operational standards in classified environments.

EDUCATION & TRAINING:

Park University

- Bachelor of Science - Information and Computers (In Progress)

Certifications Obtained

- Amazon Web Services Solutions Architect
- CompTIA Security+
- Microsoft Certified: Azure Fundamentals
